

COVID Exposure Guidance

In an effort to keep all of our families happy and healthy, we wanted to clarify when it is necessary to contact us with any concerns that someone in your household has been exposed or tested positive for COVID. All instances must be handled on a case by case basis, as each exposure is unique.

We ask that you provide the details to the Board of Directors' email (aquiapreschool@gmail.com) or call Audrey Rice at (608) 239-4210 if any of the situations listed below should arise. The sooner we know the details, the sooner we are able to get the answers and suggested solution(s) from the Health Department. We must contact them for each case, so they may provide the most accurate guidance for each family.

Possible situations include, but are not limited to:

- A member within the household has been exposed to COVID.
- A member within the household has tested positive with COVID.
- A member within the household has symptoms and thinks they may have COVID, but has not been tested.
- A member within the household is awaiting COVID test results.

The following questions are necessary for the Health Department to accurately provide us with the best way to move forward. We understand you may not have answers to all of the questions, but we ask that you do your best.

- Who was exposed?
- What date were they exposed?
- If they were symptomatic, what date did the symptoms begin?
- Have their symptoms resolved? If so, when?
- Have they been tested, on what date, what were the results, and which test was used (Rapid Test, or PCR)?

Thank you for your continued patience and cooperation as we navigate this challenging time together.

Audrey Rice
AHPS President
